

Bellman Visit PAGER Receiver

Bellman Pager Receiver A compact, portable notification device that alerts you with vibrations and light indicators when a Visit transmitter is activated. Ideal for individuals who are deaf or hard of hearing, or for use in noisy environments. Can be worn on your belt or carried in a pocket. Optional bed shaker and charger accessories are available separately for nighttime alerts.

- **Discreet Vibration:** Provides strong, non-intrusive vibrations to alert the user without sound.
- **Clear Identification:** Uses color-coded lights and distinct vibration patterns to indicate different transmitters or alerts.
- **Lightweight and Portable:** Compact design with belt clip and safety cord; approximately 8 cm long, 6 cm wide at top, 3–4 cm at bottom, 1 cm thick, weighing 65 g with battery.
- **Long Battery Life:** Operates for up to three weeks on a standard battery. Compatible with rechargeable batteries (charger available separately).
- **Adjustable Radio Key:** Allows multiple systems to operate in the same area without interference.
- **Optional Charger Accessory:** Charger unit includes two bed shaker jacks for nighttime vibration alerts (sold separately).
- **The Bellman Pager Receiver BE1230:** Provides reliable and discreet alerts, enhancing independence and safety for users who need clear and accessible notifications throughout the day and night.

In the Box:

- **Pager Receiver:** Main notification unit with built-in vibration and light indicators.
- **Belt Clip:** For convenient attachment to clothing or belt.
- **Safety Cord:** Provides extra security during use.

- **User Manual:** Complete instructions for setup and operation.

Please Note: The charger and bed shaker are optional accessories sold separately.
