

Rogue XP

Rogue XP changes with you over time so outgrowing your chair is a problem of the past, with optimised fit, function and ride, allowing up to 76 mm of depth and width growth.

- Provides maximum adjustment and growth ability so fit, function and ride are optimised
- Integrated Swing-Away Armrests move with the backrest when adjusting or growing making it an ideal paediatric manual wheelchair
- Durable ultra-lightweight solution that meets the active lifestyle needs
- Adjustable Dynamic 5th Wheel allows you to adjust both the range and spring rate
- The integrated swing-away arm and backrest system adjusts independently allowing you to achieve ideal backrest and arm positioning
- Maxx Performance Spoke - features eighteen radial spokes and a high flange hub that result in increased rigidity for a more responsive, better performing wheel
- Spinerger Release Cable - As a signature feature on the Rogue line, you will only find the Spinerger Backrest Release Cable at Ki Mobility
- A clean, aesthetic transit tie-down for a rigid frame - Integrated into the frame, the simple, curved front mounts provide safe attachment points while maintaining the sharp look you want from a chair in this class
- Transporting - Whether you're climbing into the driver's seat or hitching a ride with friends, Rogue XP's locking back mechanism and 5.3 kg transport weight makes it simple
- Creative Freedom - Rogue XP is your blank canvas giving you the freedom to choose your frame, accent, release cable and wheel colour

Code	Display Name	Seat Depth	Seat Width	Safe Working Load	Unit Weight
MWC427048	Rogue XP (as per script)	254 - 508 mm	254 - 457 mm	90.72 kg	5.26 kg
