LIVING WITH 24 HOUR POSITIONING AND SUPPORT

Most of us move our bodies hundreds of times a day - often subconsciously - to perform activities, for comfort, and to reduce stiffness and pain. People with complex movement disorders are often unable to reposition themselves or communicate that they are uncomfortable.

Long periods in the same position and the effects of gravity on the body can lead to increased risk of pressure injuries, fatigue, shortening of tendons and fixed changes to posture over time. This may have an impact on function, independence and the ability to be comfortably seated to allow for activity or social participation.

The clinical and functional benefits of a 24 hour postural management program are widely recognised, and may include:

- Improved movement patterns - minimising the impact of abnormal tone
- Promote proper skeletal alignment
- Effective pain management - increased comfort, decreased fatigue
- Improved sleep quality
- Improved positioning in sitting / standing - promotes function and participation
- Minimising the risk of developing pressure injuries
- Improved autonomic functions such as swallowing, respiration, digestion

For Complex Seating and Positioning Solutions, contact your Aidacare Complex Rehab Specialist.

NOT QUITE SURE?

Do you need help with product selection and sizes? Please contact Aidacare on 1300 133 120. For Therapist Solutions please enquire about how else we can help you.
